GRASS CEILING

Gender Equality in
Rural and Agricultural
Innovation Systems

Harvesting Results: The Legacy of the GRASS CEILING Project

GRASS CEILING (Gender Equality in Rural and Agricultural Innovation Systems) mission is to **empower rural women** and **increase the number of socio-ecological innovations** led by women across agriculture, the rural economy, and local communities. By doing so, GRASS CEILING supports the **UN Sustainable Development Goals on gender equality**, the **EU Gender Equality Strategy**, and contributes to the objectives of the **European Green Deal**, the **Farm to Fork Strategy**, the **Long-Term Vision for Rural Areas**, and the **European Pillar of Social Rights**.

Throughout its three years, GRASS CEILING has created spaces for women to **lead sustainable change in rural areas**—working through **nine Living Labs** established across diverse European contexts, from mountain regions to coastal and remote rural communities. These Labs have enabled women to co-create innovative solutions that respond to local needs while strengthening their skills, confidence, and leadership.

By combining **data analysis, policy benchmarking, training, and policy co-creation**, GRASS CEILING has developed practical recommendations and tools to make innovation systems more inclusive. The project has also fostered **European and regional networks** connecting women innovators, researchers, policymakers, and funders, laying the groundwork for lasting gender equality in rural innovation systems.

Together, these efforts ensure that women not only participate in but **shape the future of sustainable rural Europe** through creativity, collaboration, and innovation.

Project Outputs

Through collaboration, research, and co-creation, **GRASS CEILING** has helped women take an active role in shaping sustainable transitions within their communities. The project pursued its objectives by:

1 Establishing 9 Living Labs as spaces for co-creating knowledge and innovation.

2 Developing tools and recommendations to improve policies that impact on agricultural and rural women innovators.

3 Analysing the position of women in European agriculture and rural areas to build a solid evidence base for action.

4 Co-creating knowledge on gender norms and the drivers/enablers of women-led innovation.

Local representation in 9 European countries

54 video journeys of rural women innovators

29 reports and datasets

5 events

3 scientific articles

2 awards
